Smart 360

Access Control

ClickIt offers a complete line of DVR, HVR, and NVR video solutions designed specifically for retail environments. Our HVR is the perfect bridge to IP camera technology while supporting existing analog cameras. ClickIt's Smart Analytics features People Counting, Dwell Analysis as well as Smart Alerts and Smart Refund. ClickIt's Central Management technology is truly a differentiator as it manages the health and well being of all your ClickIt video systems, right down to the camera level. And, our Broadband Cellular provides real time or recorded video to your SmartPhone or PDA.

flexible - ClickIt's DVR, HVR or NVR offerings provide the flexibility to choose the platform appropriate to your needs along with support for Megapixel and 360 degree cameras. ClickIt's Advanced features are configurable and can be tailored to your specific requirements.

manageable - ClickIt's Central Management provides a dashboard view of your video assets allowing you to monitor the health and well being of your systems right down to the camera level.

cost effective - ClickIt's wide breadth of Advanced Features such as Biometric Access Control, Traffic Counting, Dwell Analysis, and POS Integration delivers value to all levels of the retail organization.
